Richelieu Hardware Inc. Liability Statement Regarding Color Matches

All efforts have been made to assure the closest match possible with the High Pressure Laminate or Melamine Pattern.

Prior to usage please verify that the color is acceptable.

Slight variations may occur due to ink blending and resin mixing.

The manufacturers’ warranty and liability covers only the value of the edgebanding. No other costs will be honored.

CHARACTERISTICS

PVC and ABS Edgebanding	ABS Edgebanding Benefits	Wood Edgebanding
We stock more than 4000 combinations matched to the major board manufacturers such as Panval, Flakeboard, Tafisa, Wilsonart, Nevamar, Formica, Panolam, Pionite et Parapan. Richelieu is the principal partner to Uniboard's Panval INTEGRA's program. All Panval colors are available in PVC and ABS edgebanding in most of the following sizes : • 7/8" x 0,018" • 1-1/8" x 0,020" • 7/8" x 3mm • 1-1/8" x 3mm	Description ABS is a "GREEN" alternative to PVC. Environmental advantages: • Chlorine-free • No heavy metals • Free formaldehyde Advantages and benefits • Higher heat resistance (ideal for kitchen cabinets) • Lighter in weight (easier to handle and ship) • Non-static (no dust attraction - cleaner edge trimming) • Can be incinerated or disposed with general waste • Same edgebander set-up and hot melt as for PVC • Higher impact resistance than PVC (no scratching)	Manufactured by Cedan Industries, a subsidiary of Richelieu Hardware, providing the industry with a vast array of Domestic and Exotic species. Available widths 1/2" to 12" in thicknesses 0.6 mm to 3 mm. Available in the same wide array of wood species as it's flexible veneer sheets, Cedan's wood edgebanding is finger jointed and masterfully matched to assure perfect consistency of color grain. All products manufactured by CEDAN and distributed by RICHELIEU are GREENGUARDSM CERTIFIED and eligible to receive credits for the LEED program.

HOW TO ORDER

GENERIC COLORS, textured finish

COLOR NUMBER	LAMINATE NAMES	RICHELIEU NUMBER

•	•	•	•	•	•	•	•

To get the complete product number, just add the measurement to the Richelieu number.

T030 + 01824 (018: the thickness; 24: the width in mm) = T0301824 = Product Number

On the website; register the beginning of the number in the search box and get all the combinations available of this edgebanding color. Items identified with a dot "•" are stock. Other sizes may be available.

Find it on our Website

The first step is to create a personalized account and password. Thereafter, you click on "sign in". Our website allows you to browse and compare a variety of colors available in edgebanding; to help you make an informed choice. Once your selection is done, you simply enter the number of rolls to order and click on the little cart. The item will automatically be add to your order and you will see at the top right on the top of the page (the quantity and the amount of your order). Then you click on the icon "proceed to secure checkout" and you will be asked for your shipping address order confirmation. By placing your order on our website; you will know your lead time much faster than by telephone and your freight costs will be lower set as if you ordered it from your default warehouse even if it is shipped from another branch.

Edgebanding special orders

A special order can be placed for as little as 12,000 linear feet of thin ABS or PVC edgebanding or 5,000 feet of thick edgebanding (1, 2, 2.5 or 3 mm) and will be produced 10 to 15 working days.

"Match to Board" Program

Richelieu offers a unique "Match to Board" program that allows you to make your perfect match of your edgebanding to the manufacturer board. This way you can consult your Panval, Tafisa, Wilsonart, Formica or other chain set and get a color match for your stain or special finish.

Edgebander glues

Richelieu is the exclusive distributor for Kleiberit's extensive high quality hotmelt glue program for edgebanders. Our well trained sales representatives are available to answer your questions and help with all your gluing problems.

OUR MULTI-PLY EDGBANDING IS AVAILABLE IN THE FOLLOWING SIZES:

- Thicknesses: 1 mm (2 plys) and 1.5 mm (3 plys), rolls of 492 feet (150 meters).
- Thicknesses: 2 mm (4 plys), 2.45 mm (5 plys), 2.85 mm (6 plys), and 3 mm (6 plys), in rolls of 328 feet (100 meters).
- Thickness of 3 mm, 2 plys, in 96-inch strips.
- Thickness of 2.8 mm, 3 plys, in rolls of 300 feet.
- Sold in rolls by linear meter.
- Other species available on request.
- See exotic veneer program for matching sheets..

EvolutionHD

Engineered Veneer at its Finest. Richelieu Hardware introduces 50 Wood Grain Patterns available in 48" x 96", 48" x 120", 96" x 48" and 120" x 48".

Finishes:

Unsanded, Pre-Sanded and Prefinished in a clear Varnish.

These tenderized veneer sheets offer a selection of backers to meet you exacting specifications.

To compliment this selection, Richelieu is the only Distributor able to offer matching edgebanding in either thin or thick material in widths from 5/8" to 11".

Long grain or Short grain.

Evolution HD raw veneers (no backer) are also available to customers having the capability of in house laminating. Sizes: 26" x 99", 26" x 135", 50" x 99", 50" x 135".

Talk to your Richelieu sales representative for color samples on this product offering.

Thick Edgebanding in 1mm to 1.5 mm may be produced on demand. Prices subject to change without notice. All sheets are sanded with a 150gr paper.

CUTTING METHOD AND APPEARANCE

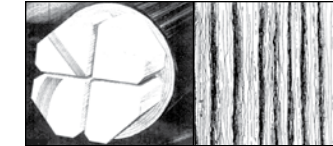

CUTTING METHOD APPEARANCE

FLAT CUT

Also called PLAIN SLICE, it is the most common method of veneer manufacturing, producing a grain pattern known as cathedral. Because each leaf in the flitch is similar, a consistent and even matching pattern is possible. Flat cut veneer is ideally suited for wall panels and furniture.

CUTTING METHOD APPEARANCE

QUARTER CUT

This cut requires the largest diameter logs and produces straight-grained veneers. The quarter slicing of oak can result in the appearance of flake.

RIFT CUT

Produced by cutting at a slight angle to the radius to produce a quartered appearance without excessive ray flake. The rift cut method is commonly used for oak, and can only be used on sizable logs. Rift cut veneer can easily be sequenced and matched.

CUTTING METHOD APPEARANCE

ROTARY CUT

The log is turned in a circular motion against a knife, peeling off a continuous thin sheet of wood veneer (like unrolling wrapping paper). It is the most economical method of producing veneer, resulting in the highest yield. The grain is inconsistent and sheets are most difficult to match. This type of veneer is best suited for paint grade or utility surfaces.

PRODUCT DESCRIPTION

PAPER BACKING

Veneers with paper backing need to be glued using contact cement. Two backing thicknesses are available: .010" or .020". Veneers with .010" backing are available preglued or prefinished. .010" THICKNESS Recommended for perfect surfaces. .020" THICKNESS Recommended for surfaces with slight imperfections.

2-PLYS (wood on wood)

2-plys veneer is made of two layers of veneer, making it stiffer and more resistant to impacts. Its use is strongly recommended for applications requiring a water-based glue.

PHENOLIC RESIN BACKER

These are veneer skins glued to a thick phenolic resin backer: Standard light brown. PB BEIGE: Light beige color. They can be installed exactly as a laminated sheet.

HPL (High Pressure Laminate)

The HPL is a high pressure laminate semi-flexible hard backer veneer sheet product. It has flexibility making it possible to use with medium curved application. Its rigidity provides resistance to impact and eliminates the telegraphing of substrate imperfections. This product offer a superior stability.

PSA (PEEL & STICK)

Paperback PSA (Pressure Sensitive Adhesive) may be filled, sanded, stained, and final finished just like paperbacked veneers with the added convenience of simple peel & stick attachment.

CABINETMAKER GRADE VENEERS

Our cabinetmaker-grade veneer is a special 5-sheet pack manufactured sequentially. This ensuring uniformity in hue, tint and appearance, and the best look possible for your work.

Backer .010", 48 x 96 inches, flat cut- book matching

Edgebanding HOT MELT GLUE CARTRIDGES

JOWATHERM cartridge hot melt

- Medium-high viscosity hot melt.
- Very economical with good color and heat stability in the melt.
- Good wetting and adhesion properties

VOLUME	NO.	COLOR	QTY/BOX
35 LBS	JW28680	NATURAL	48
35 LBS	JW28681	WHITE	48
35 LBS	JW28683	BLACK	48

CHARACTERISTICS :

Base: Ethylene-Vinyl Acetate (EVA)
 Viscosity: 120,000 at 190°C
 Feed speed: Roller application:
 18-60m/min (50-180 ft/min)
 Nozzle application: 10-40 m/min (30-120 ft/min)
 Working temperature: 190-210°C (374-410°F)

APPLICATION FIELD :

- Hot melt Holz-Her cartridge edgebanders. Suitable for primed HPL, solid wood, veneer, PVC and resinated paper edgebands.
- Can be used for precoating and softforming applications.

JOWATHERM cartridge hot melt

- Medium viscosity hot melt with high heat resistance and good cold flexibility.
- Excellent color and heat stability in the melt

VOLUME	NO.	COLOR	QTY/BOX
26 LBS	JW28630	NATURAL	48

CHARACTERISTICS :

Base: Ethylene - Vinyl Acetate (EVA)
 Viscosity: 70,000 at 190°C (374°F)
 Approx. 50,000 at 200°C (392°F)
 Color: Natural
 Feed speed: Roller application:
 18-60 m/min (50-180 ft/min)
 Nozzle application: 10-40 m/min (30-120 ft/min)
 Working temperature: 180-200°C (356-392°F)

APPLICATION FIELD :

- Hot melt for Holz-Her cartridge edgebanders.
- Suitable for primed HPL, solid wood, veneer, PVC and resinated paper edgebands.
- Good wetting and adhesion properties.
- Can also be used for precoating and softforming applications.

JOWERTHERM cartridge hot melt

- Medium viscosity hot melt
- Very economical with good color and heat stability in the melt

VOLUME	NO.	COLOR	QTY/BOX
55 LBS	JW29630	NATURAL	1
55 LBS	JW29631	WHITE	1

CHARACTERISTICS :

Base: Ethylene - Vinyl Acetate (EVA)
 Viscosity:
 Approx. 120,000 at 190°C (374°F)
 Approx. 90,000 at 200°C (392°F)
 Approx. 70,000 at 210°C (410°F)
 Working Temperature: 190-210°C (374-410°F) in the melt

APPLICATION FIELD :

- For edgebanding veneer, resin impregnated paper edgebands, PVC and similar.
- Good wetting and adhesion properties.

Edgebanding GRANULAR HOT MELT

Richelieu

JOWERTHERM granular hot melt

- Medium-high viscosity hot melt.
- Very economical with good color and heat stability in the melt.
- Good wetting and adhesion properties.

55 LBS.	JW28863	BLACK	1

CHARACTERISTICS :

Base: Ethylene – Vinyl Acetate (EVA)
Viscosity:
Approx. 120,000 at 190°C (374°F)
Approx. 90,000 at 200°C (392°F)
Approx. 70,000 at 210°C (410°F)
Feed speed: 12-60 m/min (30-120ft/min)
Working Temperature: 190-210°C (374-410°F) in the melt

APPLICATION FIELD :

- For edgebanding veneer, solid wood, resin impregnated paper edgebands, PVC, ABS, and primed HPL.
- Can also be used for precoating and softforming applications.

JOWAT Econo edgebanding granular hot melt

- Excellent melt performance after initial melting, good heat resistance, good adhesion and bond stability at low temperatures.
- High oxidation and color stability in the melt.

VOLUME	NO.	COLOR	QTY/BOX
44 LBS.	JW2887044	BEIGE	1

CHARACTERISTICS :

Base: Ethylene – Vinyl Acetate (EVA)
Viscosity:
Approx. 100,000 at 180°C (356°F)
Brookfield-Thermosel
Approx. 75,000 at 190°C (374°F)
Approx. 55,000 at 200°C (392°F)
Feed speed: Roller application:
12-40 m/min
Working Temperature: 180-200°C (356-392°F) in the melt

APPLICATION FIELD :

- For edgebanding veneer, solid wood, resin impregnated paper edgebands, PVC, ABS, and primed HPL.
- Can also be used for precoating and softforming applications.

JOWATHERM edgebanding granular hot melt

- Low viscosity hot melt with fast melting properties, long open time and good color and heat stability in the melt

VOLUME	NO.	COLOR	QTY/BOX
44 LBS.	JW2822044	NATURAL	1

CHARACTERISTICS :

Base: Ethylene – Vinyl Acetate (EVA)
Viscosity: Approx. 60,000 at 130°C (266°F)
Brookfield-Thermosel
Approx. 40,000 at 140°C (284°F)
Approx. 30,000 at 150°F (302°F)
Feed speed Roller application :
5-20 m/min (15-60 ft/min)
Working Temperature: 130-150°C (266-302°F) in the melt

APPLICATION FIELD :

- Designed for contour edgebanding of PVC, paper, and polyester at low application temperatures and at very slow feed speeds.
- Suitable for softforming PVC edges.

JOWATHERM edgebanding granular hot melt

- Medium viscosity hot melt with high heat resistance and good cold flexibility
- Excellent color and heat stability in the melt
